Tapeswitch adds various Tactile Remote switches to product offering

February 2009, Farmingdale, NY. Tapeswitch Corporation recently announced a new addition to their extensive line of pressure sensitive safety and sensing switches, the Tactile Remote Switch.

Used to activate lights and / or lasers with minimum actuation, this Tactile Remote Switch has a variety of applications. Among the line of four different tactile products being offered by Tapeswitch, includes a Tapeswitch Ribbon Switch version of a typical tactical switch which performs the same application of the Tactile Remote Switch from leading competitors. Tapeswitch's exclusive manufacturing process allows for highly competitive pricing as well.

“We are committed to keeping pace with market demands and meeting the product needs of all our customers. We pride ourselves on rapid turnaround time and excellent customer service.” says Barry Lipsman, Tapeswitch's Sales Manager.

For more information on Tapeswitch and their line of Tactile Remote Switches, please contact their factory directly at 631-630-0442 or visit their website at www.tapeswitch.com.

Tapeswitch designs and manufactures innovative sensing, switching, and control products for use in machine guarding, personnel protection and other safety and control applications. Tapeswitch products include ribbon switches, sensing edges, and bumpers, safety mats, touch pads, controllers, and light curtains. If a standard product just won't do the job, extensive custom design services are available.
