Date: 5/2019

Tapeswitch™ is a US-based manufacturer of electrical safety equipment. We offer a full spectrum of sensing and signaling products for protection, detection, and safety. Whether your guarding personnel or property, Tapeswitch™ brings 60 years of experience along with reliable quality products that will help you meet your needs.

Tapeswitch™ offers a wide range of custom safety products for use in automotive, packaging, and robotics industries to name a few. Our unique and highly successful press-at-any-point ribbon switch can be used in literally thousands of applications and is the foundation of our custom safety mats, edges, and bumpers. Our ability to customize products for our large customer base in a timely fashion makes us unique. Our safety mats can be cut to fit, radiused or multi-zoned.

We manufacture eight different sensing edges with multiple colors, mounting channel, wiring, connectors, activation, and over-travel options. We also manufacture rugged safety bumpers for use in auto-guided vehicles. We offer a full line of compatible safety controllers and technical assistance for installing our products. In order to better serve our customers, we have strategically partnered with two companies, Castell, which offers one the best trapped-key interlock systems on the market, and Machan's non-contact interlocks are suited for an array of applications in many industries. We're also very excited about our recent agreement with ReeR, an Italian manufacturer of safety light curtains.

For your convenience, we offer one-on-one consultation with one of our highly qualified representatives who works directly with our engineering department to ensure that you are ordering the right products for your specific needs. We can also evaluate and offer suggestions on guarding other vulnerable areas. We believe it's our commitment to manufacturing custom, quality, on-time products with excellent customer service that makes us able to meet all your safety needs.
