Date: 6/2019

Tapeswitch is a U.S. based manufacturer of electrical safety equipment. We offer a full spectrum of sensing and signaling products for protection, detection, and safety. Whether it be guarding personnel or property, Tapeswitch continues to serve the packaging industry with ISO 9001:2015 certified, safety-rated emergency shutdown, presence sensing, and contact detection solutions.

We offer low, medium and high-profile sensing edges with immediate activation or with overtravel which provides cushioning after activation. Multiple colors, mounting channel wiring (fail-safe standard) and connector options are available. We specialize in custom, multi-edge systems which can be provided with mitered channels and special connectors. Our diverse line of sensing edges makes us a good choice for monitoring and guarding packaging machinery.

Our distinct line of safety mats includes standard or custom sizes featuring our exclusive press at any point switch. Whether it be cut to fit, radiused, multi-zoned, molded for environmental applications or our popular rugged diamond plate mat, Tapeswitch is the obvious choice for all your safety needs. We also offer a line of compatible safety controllers with technical assistance for installation via email or phone if needed.

To offer the packaging industry a full spectrum of safety products, Tapeswitch has partnered with Mechan Controls a leading manufacturer of non-contact interlocks and ReeR a leading manufacturer of light curtains, specifically their safeguard line. Both products are widely used in the packaging industry.

For your convenience, Tapeswitch offers a one-on-one consultation with one of our highly qualified representatives who works directly with our engineering department to ensure that you are ordering the right products for your specific needs. We can also evaluate and offer suggestions on guarding other vulnerable areas. We believe it's our commitment to manufacturing custom, quality, on-time products with excellent customer service that makes us able to meet all your safety needs.

Please contact blipsman@tapeswitch.com for any questions or comments and be sure to stop by our Booth #E-9720.
